C65: Ruy Lopez: Berlin Defence (3...Nf6), unusual lines and 4 0-0 Bc5
CC HeaderStart CC Section C - Sacrifices for damage CC HeaderEnd CC We move on to an even more exciting part of this chapter: the sacrifices that AlphaZero makes to expose the opponent's king. Game: 'Wizard chess' From a sedate anti-Berlin opening, AlphaZero spots a stunning way to inject danger into the position with a double pawn sacrifice: 14... f5 and 16... e3. The result is a sudden attack that delivers at least perpetual. AlphaZero tries for more, but Stockfish holds firm. Game themes: 1. Sacrificing material to free space for attacking pieces 2. Sacrificing material to damage the opponent's king's position

E05: Open Catalan: 5 Nf3 Be7
Delgado,N: 'Inf 88/410' I wanted to provide an informational to show the most natural way to play against the Catalan and explain why we went for the rare sideline in this course. The following theory was taken from my Aggressive Queen's Gambit Declined course if you are thinking of playing this as an alternative. White has multiple options, some of which are quite theory-intense and easy to err in. We wanted something more points A to B and ideas based in this text. Let's get into some of the honeycomb variations to see what you would need to learn to play against the mainline Open Catalan with Black. Anytime it is noted that White has other options they are covered in detail in the aforementioned text. We stuck to the mainlines to give the reader an idea of the complexity of the mainline. **1.Nf3 d5 2.c4 e6 3.g3 Nf6 4.Bg2 Be7 5.0-0 0-0 6.d4 dxc4 7.Na3N**
